Bangalore, India

PROFESSIONAL SUMMARY

Computer Science and Engineering Graduate (CGPA: 8.9) with practical experience in Python, Django, SQL, HTML, CSS, JavaScript, and React. Completed a Full Stack Development internship and developed projects in web development, machine learning, and database management. Familiar with data analysis, visualization, and reporting using Power BI and Excel. Passionate about building scalable applications and solving real-world problems through technology. Seeking opportunities in Python Development, Django Development, Front-End Development, and Data Analytics.

EDUCATION

B.TECH IN COMPUTER SCIENCE AND ENGINEERING

BTI-Banglore Technological Institute [CGPA:8.9]

DEC 2022 – MAY2026

CERTIFICATIONS

- Programming In Python | **NPTEL {CEC}**
- PYTHON Programming & Basic JS,PHP | **Udemy**
- Introduction To AI, ,Natural language Processing , Deep Learning | **Infosys Springboard**
- Introduction to Modern AI | **Cisco**
- Power BI and CHATGPT for Data Analytics | **Simplilearn**

WORK EXPERIENCE

FULL STACK INTERN | Future Interns

Aug 2025 – Sept 2025

- Developed a responsive portfolio website using HTML, CSS, and Bootstrap to effectively showcase projects, skills, and professional achievements.
- Designed and implemented a mini e-commerce platform using JavaScript, SQL, and PHP, incorporating product management, shopping cart functionality, and transaction workflows.
- Redesigned the Starbucks website prototype using Figma and React, enhancing user interface consistency, component reusability, and overall user experience.
- Applied front-end and database development concepts to deliver functional and user-centric web applications.

ANDROID APP DEVELOPMENT USING GENAI INTERN | Mind Matrix

Feb 2026 – May 2026

- Developed Aushadhi Setu, an Android application using Kotlin, Jetpack Compose, and SQLite to help users discover generic medicines and nearby Jan Aushadhi stores.
- Designed intuitive user interfaces and implemented seamless navigation to improve accessibility and user engagement.
- Integrated SQLite database functionality for efficient storage and retrieval of medicine-related information.
- Implemented medicine reminder features to support medication tracking and adherence.
- Conducted testing and debugging activities to enhance application performance, reliability, and usability.

PROJECTS

1. Pharmacy Management System

GitHub: [Pharma-Pill-Point-Management\[LINK\]](#)

- Developed a Django-based **pharmacy management system** for managing medicine inventory, billing, sales tracking, and pharmacy operations.
- Designed and integrated a secure database for efficient storage and retrieval of medicine and transaction records.
- Implemented inventory monitoring, prescription management, and billing functionalities to streamline pharmacy workflows.
- Built a user-friendly interface to improve operational efficiency and reduce manual effort.

2. Real-Time Malicious URL and Inappropriate Content Blocking System (Major Project)

GitHub: [Real-Time-Malicious Detection\[LINK\]](#)

- Developed a **secure browser extension** to detect and block malicious, phishing, and inappropriate websites in real time.
- Implemented machine learning-based threat detection and URL reputation analysis to identify harmful web content.
- Integrated real-time URL scanning and content filtering mechanisms to enhance safe browsing.
- Improved cybersecurity by proactively preventing access to unsafe websites.

3. Mini E-Commerce Website (Trigo)

GitHub: [E-Commerce\[LINK\]](#)

- Developed **Trigo**, a responsive mini e-commerce platform using React.js and Tailwind CSS.
- Implemented product browsing, cart management, and checkout simulation features to provide a seamless shopping experience.
- Designed a responsive and user-friendly interface optimized for different screen sizes and devices.
- Enhanced user navigation and shopping workflow through modern front-end development practices.

4. Aushadhi Setu – Android Application

GitHub: [Andriod Application\[LINK\]](#)

- Developed **Aushadhi Setu**, an Android application using Kotlin, Jetpack Compose, and SQLite to help users find generic medicines and nearby Jan Aushadhi stores.
- Implemented medicine search, store locator, and reminder functionalities to improve access to affordable healthcare services.
- Designed intuitive user interfaces and seamless navigation using Jetpack Compose to enhance user experience.
- Integrated SQLite database management and performed testing and debugging to ensure application reliability and performance.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML, CSS, PHP

Frameworks & Technologies: Django, React, Jetpack Compose, Tailwind CSS, Bootstrap

Databases: MySQL, SQLite, DBMS

Data Analytics & Visualization: Power BI, Microsoft Excel

Tools: Git, GitHub, VS Code, Anaconda, Microsoft Office

Platforms: Linux, Ubuntu, Windows, VirtualBox

SOFT SKILLS

Problem Solving | Team Collaboration | Communication | Time Management | Quick Learner | Adaptability

LANGUAGES

- **English** | Full Professional Proficiency
- **Hindi** | Full Professional Proficiency
- **Kannada** | Native Bilingual language
